

Whole Body Support

Whole Body Support is a combination of animal tissue concentrates, whole vitamin complexes, minerals, botanicals, and phytonutrients that provide important cellular substrates to a variety of tissues. With the focus on the endocrine system and support for the immune system, liver, and kidneys. Whole Body Support has a wide range of clinical applications ranging from those with general support for optimal health to those with chronic disease. Geriatric patients and patients that are debilitated should receive this product. Patients with nonspecific complains will benefit from this general support. Whole Body Support can also be used in patients with metabolic or surgical conditions that require a long recovery. In addition, this product can be combined with other Standard Process Veterinary Formulas to offer a more comprehensive nutritional support plan.

Suggested use:

- General, multi-system support for daily maintenance of all body systems, especially the liver, kidney, GI tract, heart, and adrenal glands.
- Multi-vitamin for all ages

Canine and Feline Whole Body Support contains many whole food ingredients combined and concentrated at low temperature to preserve their nutritional value. The combination of these foods, not just a single component, provides the vitamins, minerals and micronutrients your pet needs to build a nutritional foundation and maintain optimal health.

Your veterinarian may suggest Whole Body Support as a multivitamin for all pets, senior pets with pre-existing health problems, broad spectrum for all body systems.

Standard Process offers a full line of Veterinary Formulas to help meet your pet's specific nutritional requirements. Ask your veterinarian which products are best for your pet.
